

## QUARTERLY OPERATIONS REPORT TO 31 DECEMBER 2014

- Exercise of Option – Sri Lankan Mineral Sands Project
- First Drilling Results reveal significant results for Total Heavy Metals (THM)

### SRI LANKAN PROJECT

#### Exercise of Option

On 29 December 2014, Windimurra Vanadium Limited (“**Company**”) announced that it had completed its due diligence and exercised its option to acquire 100% of the issued capital of Srinel Holdings Limited (“**Srinel**”) in accordance with the Option Agreement dated 19 March 2014 (“**Acquisition**”).

Srinel is an unlisted company registered in Mauritius which owns 13 exploration licenses in various coastal districts of Sri Lanka that are prospective for mineral sands. Completion of the Acquisition is subject to the Company obtaining all necessary shareholder and regulatory approvals.

#### Drilling Results

As announced to ASX on 9 December 2014 the initial drilling programs were completed with first hand-held auger drill results received by Srinel.

GeoActiv (Pty) Ltd reported on the total heavy mineral (THM) results from the Tetra Bromo Ethane (TBE) heavy fraction separation from an exploration program undertaken on three of the thirteen Sri Lankan Heavy Mineral Sands exploration licences (EL180, EL182 and EL203). A total of 7 batches of results were received.

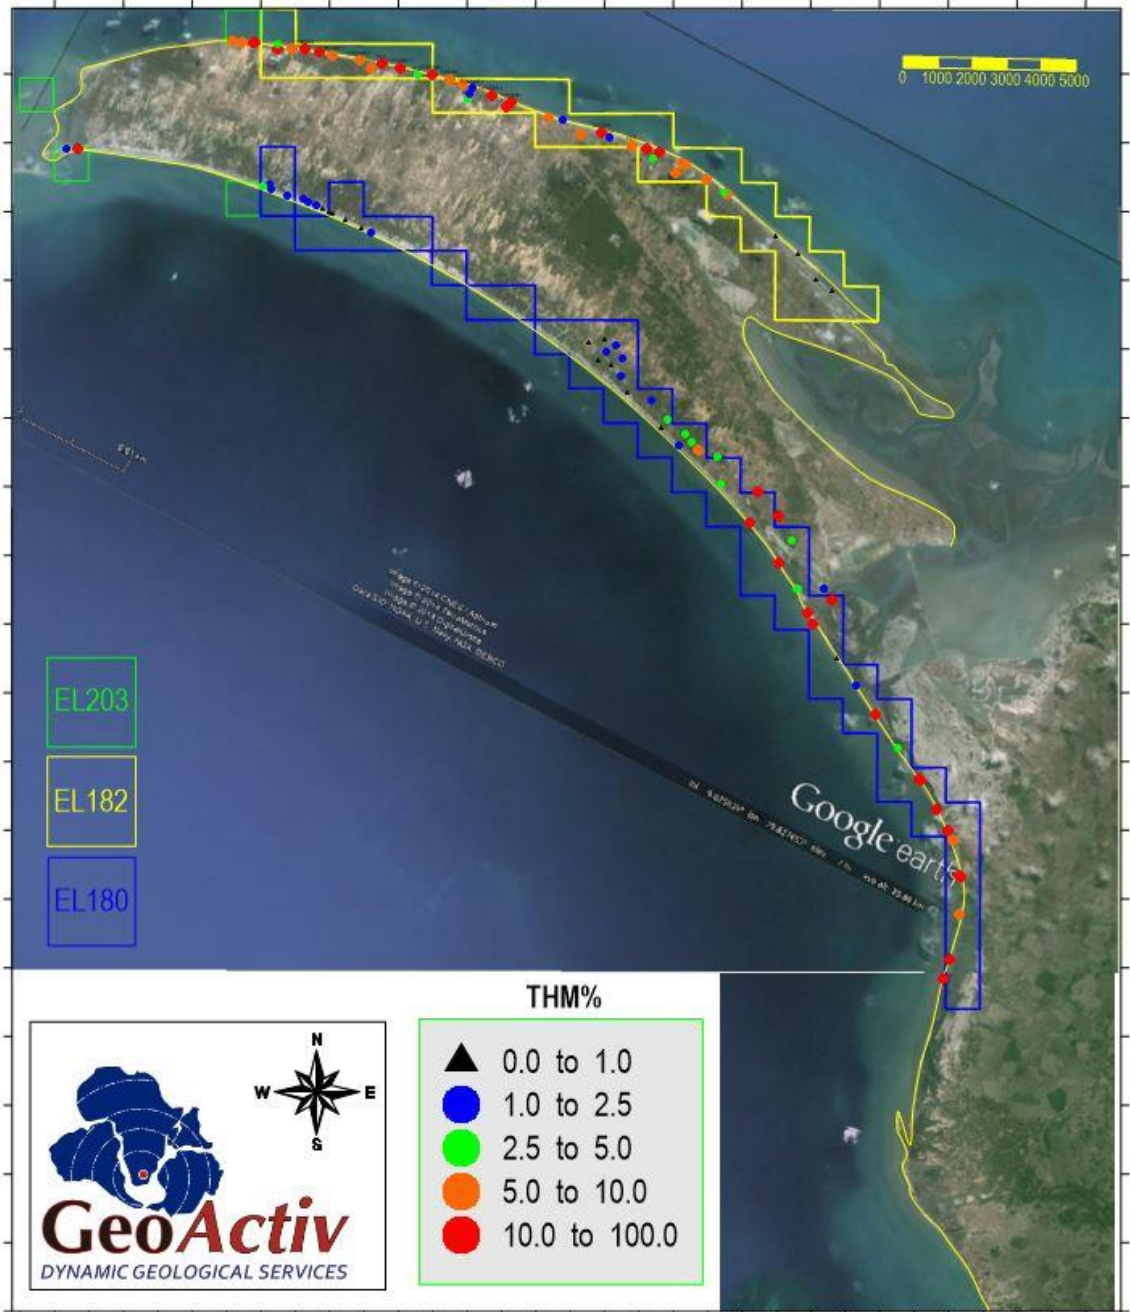

The THM results received from the first two batches have proven the presence of high THM grades within EL182, the highest weighted average THM grade received being 41.14% THM over a 200cm interval for auger hole NS12. The results have verified THM grades of historic work done by the Sri Lankan Geological Survey and Mines Bureau, as well as indicating a ~10km strike-length of mineralisation. The average weighted THM grade for EL182 is 12.26% THM over 172cm for the results received. Some drilling further from the coast showed that mineralization is open in this area and most of the holes are also open at depth, with grades >1% THM for the deepest samples.

Results for batches 3 to 7 returned some very good THM results, with the highest weighted THM grades in EL182, EL180 and EL203 being 19.76 %THM over 229cm in TUPE/BM11, 24.05 %THM over 95cm in NS56 and 22.27 %THM over 135cm in WB25 respectively. Average weighted THM grades (holes >1 %THM) for the mineralized area within EL182 is 7.89 %THM over 185cm across a 10.54 km strike-length and within EL180 is 8.65 %THM over 138cm across a 18.71km strike-length. The exploratory work within EL203 did return a weighted THM grade of 10.78 %THM over 138cm across a 1.00 km strike-length in one block, with a second block only explored by 2 augerholes (positive results).

## Further Analytical and Mineralogical Analyses

Further analytical and mineralogical analyses of the drill samples and element assessment is underway and results are expected to be released during February-March 2015.

**Competent Person Statement :** The details pertaining to exploration results are based upon information compiled by Mr. JN Badenhorst from GeoActiv (Pty) Ltd. Mr. Badenhorst is an independent consultant for Srinel. He is a Member of the South African Council for Natural Scientific Professions (registration number 400157/07) and has sufficient experience which is relevant to the style of mineralisation and type of deposits under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr. Badenhorst consents to the inclusion in this release of the matters based on the information in the form and context in which it appears.

## **WINDIMURRA VANADIUM PROJECT**

During the quarter, an initial technical review of the Company's Western Australian mining lease M58/272 was undertaken to consider prospectivity and future exploration activities.

## Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Financial Reporting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
